

Attention : Mr.Umer Iqbal

SUBJECT:**Quotation for Grade 60 Rebar**

Dear Sir,

M/S AFAQ Steel (Premium Batala) has continuously served the construction industry within the country for more than half a century. Driven by patriotism and loyalty to strengthen infrastructure of a new nation. Premium Batala ahead of all others empowered by cutting-edge manufacturing, testing equipment, quality assurance processes and passionate team.

Premium Batala offers finest quality Re-bars. The specifications vary in yield strength, ultimate tensile strength, chemical composition and percentage of elongation. Each grade is produced by prime quality steel billet which conform International Standards.

Following are the Grades of Deformed Steel Bars manufactured at Premium Batala:

Grade 40

Grade 60

Grade 80

In addition to Deformed Steel Bars our group is also one of the Prominent Supplies for I-Beam, T-Iron, Angles & Channels.

We put our products to the test and check every single aspect that contributes to the strength and durability. We delicately carry out thorough testing of all of our produce which include:

- Chemical Composition Test
- Tensile Test
- Bend Test
- Yield Stress Test
- Elongation Test

We further request to visit our head office, and factory giving us opportunity to demonstrate product, testing facilities, and production processes.

Very truly yours,

**Usman Aslam**
